ABOUT

Full-Stack Developer with hands-on experience building web applications end-to-end — from crafting responsive, user-facing interfaces to designing and shipping robust RESTful APIs and backend services in C# and .NET. I care deeply about clean architecture, SOLID principles, and writing code that's as maintainable as it is performant. Whether it's wiring up a front-end, architecting a database schema, or integrating LLM-powered features and AI tooling into backend services, I bring a full-stack mindset to every project.

CAREER

Experience

Hitachi Energy

Mid 2026 – Present

Technical Support Specialist — .NET & SQL

Barcelona, Spain · Hybrid

- Providing technical support and development expertise in .NET Framework and SQL across enterprise energy management systems.
- Diagnosing and resolving application issues in a hybrid environment, collaborating with cross-functional teams to ensure system reliability.
- Supporting internal tooling and backend services built on .NET, maintaining data integrity through SQL database management.

Concentrix

2025 – Mid 2026

Support Engineer — Security & Compliance

Remote

- Automated administrative tasks and compliance data reports using PowerShell scripting, reducing manual effort across daily security operations.
- Integrated with Microsoft Graph API to manage enterprise identities, permissions, and access controls at scale.
- Provided technical expertise in Microsoft Purview and Microsoft 365 security frameworks, supporting governance and regulatory alignment.
- Debugged and remediated compliance policies and information governance configurations.

Vueling Airlines / Vueling University

Late 2024

Backend .NET Developer

Viladecans, Spain

- Developed high-performance WebAPIs using .NET Core and C# in a fast-paced airline tech environment.
- Applied SOLID design principles to deliver maintainable, scalable backend services.
- Utilized Entity Framework for database abstraction and ORM management.
- Implemented Unit Testing with xUnit/NUnit and Moq to enforce code quality standards.

Garoina Comunicació

2023 – 2024

Software Programmer

Platja d'Aro, Spain

- Developed and maintained full-stack applications with PHP, C#, and Angular across multiple client projects.
- Designed and optimized relational databases using SQL Server (SSMS) and MySQL.
- Documented and tested APIs using Swagger/OpenAPI, improving frontend-backend integration workflows.
- Managed version control and CI/CD pipelines via GitHub.
